Tuesday 2nd October 2020

Dear Parent/Carer,

I would like to say a huge thank you to everyone for supporting us in setting up **ClassDojo** over the last two weeks. This platform will be important to allow children to submit work and receive feedback from their teacher as part of their learning process should they need to work at home.

In order to ensure **ClassDojo** is working well, we have been testing this platform by sending homework over the last week. Most parents seem to be able to use this platform to receive and send their child's work back into school, however, we are aware that there are still a few parents who have not been able to access their child's learning homework tasks.

Some issues that have arisen have meant that perhaps some families cannot log on correctly on a lap top to work or they have had some problems letting their children do the work.

We have been evaluating this in school and in order to support everyone, I am asking everyone to ensure that:

- a. You have set up a parents' account.
- b. Set your child up with their account to work on. This is linked to you via the unique code which is sent out. To support this I have sent a **message** direct to your **ClassDojo** parent account allowing you to log your child in *correctly* if you have had problems.
- c. Accepted the terms of use on ClassDojo. a number of parents have recently done this and have found that they can fully access their child's profile –not doing this may prevent you from using the platform and accessing their activities.

Please check these **three** things.

I have set all children a simple test task today. They just have to reply by saying hello. This will help us check that everyone is accessing this platform successfully. Please let us know if you are continuing to struggle this week and we will contact you to support you. In addition, it is important that the children have completed the tasks set by the class teacher and returned via **ClassDojo**.

Yours faithfully

Mr D Kennedy
